SECTORS

Offices and workplace	Fit-outs and refurbishments in multi-let buildings where the floors above and below are still trading.
Industrial and logistics	Power, distribution and lighting for warehouses and production that cannot stop for us.
Education	Schools, colleges and academies, with the noisy work in the holidays and every operative DBS checked.
Retail and hospitality	Shops, restaurants and leisure, refitted overnight so the doors open on time every morning.
Healthcare	GP surgeries, dental practices and care homes, worked around patients and kept clean.

WHAT WE DO

Commercial fit-out	Complete electrical fit-outs for offices, retail and light industrial, from containment and distribution to commissioning and handover.
Distribution and containment	New LV distribution, sub-mains and the containment that carries them, from switchroom to final board.
Lighting and controls	LED upgrades and lighting controls that cut energy use, with the payback worked out before you commit.
Emergency lighting	Emergency lighting designed, installed and tested to BS 5266-1, with the monthly and annual tests logged for you.
Fire detection and alarm	Fire detection and alarm systems installed, extended and serviced to BS 5839-1, to the category your fire risk assessment sets.
Testing and inspection	Fixed wire testing, thermographic surveys and PAT across your estate, scheduled around how each building is used.
Planned maintenance	Planned preventative maintenance with reactive cover, response times in the contract and every visit recorded.

SELECTED PROJECTS

Cat B fit-out across three occupied floors

Spinningfields, Manchester · offices · £400k to £500k · 14 weeks

Handed over seven days ahead of the client's move date, with no unplanned shutdown of the landlord's supply and not one complaint from another tenant.

Power and distribution for a new automated line

Warrington · industrial and logistics · £250k to £350k · 10 weeks, two weekend shutdowns

The automation was powered and tested on the date the integrator had planned around, with both shutdowns finished early and not one lost shift.

LED and emergency lighting in a summer holiday

Stockport · education · £150k to £200k · 6 weeks, in the summer holiday

Finished four days early, with lighting energy down 61% and every escape route on self-test emergency lighting.

An overnight lighting refit, open every day

Altrincham · retail · £50k to £100k · 4 weeks of nights

The store opened on time every morning, and lighting energy fell by 48%.

HEALTH AND SAFETY RECORD

RIDDOR-reportable incidents	0 in the last five years
Accident frequency rate	0.00 (rolling three years)
Operatives with ECS cards	100%
Supervisors with SSSTS or SMSTS	100%
